(54) METHOD FOR PRODUCING HIGH-PURITY ADAMANTANES

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a method for industrially advantageously producing high-purity adamantanes in good yield by economically purifying the adamantanes obtained by isomerizing trimethylenenorbornane without giving load on the environment.

SOLUTION: The method for producing the high-purity adamantanes comprises separating the adamantanes obtained by isomerizing the trimethylenenorbornane by crystallization and solid-liquid separation, and washing the crude adamantanes with a washing solvent.

LEGAL STATUS

[Date of request for examination]

08.03.2005

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
